Dosyaları Seç CW\_6.pdf

Result: 1 check, all files are different

---

## Sample code

```
function fileSelect() {
    fetch(remote.value).then(r => r.blob())
    .then(checkFiles) //called with Blob b
}
function checkFiles(b) {
    let a = [...local.files]
    let t = "";
    //Implement this
    let x = remote.value.split("/");
    let q = x[x.length-1];
    let equal_files = [];
    for(let yerel of a){
        if(yerel.size == b.size && yerel.type == b.type){
            equal_files.push(yerel);
        }
    }
    if(equal_files.length == 0){
        out.innerText = "Result: "+a.length+" check, all files are different";
    }
    else{
        for(item in equal_files){
            t += "Result: "+a.length+" check, "+item.name+" is the same as "+q+" \n";
        }
        out.innerText = t;
    }
}
```
