Sample code

```
class Course { //implement this
    constructor(id,clock,date, ...list){
        this.id=id;
        this.clock=clock;
        this.date=date;
        this.list=list;
    }
        toString(){
                return this.id + " " + this.clock + " " + this.date + " " + this.list;
        }
    static fromString(s) {
        return new Course(...s.split('\t'))
    }
}
function readCourses() {
    fetch(LINK+"Courses.txt").then(r => r.text())
    .then(t => makeData(t,Course,crsMap))
}
function findBest() { //the best gpa in stdMap
    let bestgGpa = 0
    for (let b of stdMap.values()){
        if(b.gpa > bestgGpa){
            bestgGpa = b.gpa
        }
    }
    report(bestgGpa);
}
```
